

**Gillette-Campbell County Airport
Passenger Facility Charge Application #6
Proposed Project Description**

I. Construct Apron

The project is the sponsor share of a future AIP project to construct additional aircraft parking for air carrier maintenance and general aviation parking. Use of the commercial service apron by general aviation aircraft will be reduced upon completing this project. The project will include a feasibility study prior to construction to determine specific tenant needs. Private and public investment in hangar facilities for air carrier and general aviation use will occur in close proximity to this new apron. The PFC cost will be the sponsor share of this AIP funded project.

Anticipated project start date:	June 1, 2008
Anticipated completion:	October 1, 2008
Estimated project cost:	\$2,534,760
PFC amount:	\$126,738

II. Acquire Development Land

This project is the sponsor share of a future AIP project to purchase of two adjacent parcels totaling approximately 5 acres. The land is necessary to provide additional aviation development area for the airport. The parcels are contiguous with Airport property. Existing airport land for additional aviation development is minimal. The PFC cost will be the sponsor share of this AIP funded project.

Anticipated project start date:	January 1, 2008
Anticipated completion:	July 1, 2008
Estimated project cost:	\$600,000
PFC Amount:	\$30,000

III. PFC Administration

The project consists of professional services used to develop the PFC application and complete the notification, environmental, and airspace requirements.

Anticipated project start date:	May 1, 2007
Anticipated completion:	November 1, 2007
Estimated project cost:	\$10,500
PFC Amount:	\$10,500

IV. Cost Summary

Total Estimated project costs:	\$3,145,260
Total PFC Application Amount	\$167,238
